

To whom it may concern

POOL MAINTENANCE LIMITED

Mayfield School, Whitehaven, Cumbria

During the course of the above project we have found Pool Maintenance to be professional, helpful and courteous.

The work in carrying out the balance tank cleans, full plant refurbishment (including shot blasting & cleaning), replacement air release, pressure gauges, pumps, pipe work and media replacement were all carried out diligently to comply with client requirements.

Due to their performance, additional work in the form of an Air Scour system was undertaken. This, as suggested by them, gave better performance and reduced costs.

The complete re-tiling of the pool and promenades, including changing rooms, were carried out to the client's satisfaction.

They were thorough in their execution and we would definitely recommend them and use their services again.

Regards,

Ian Sandwith
